Hollowick Flameless Lighting "Flicker Without The Flame"

For over 40 years Hollowick has provided superior performance table lighting and cooking fuel products to help enhance the restaurant dining experience. We recognize the need for flameless lighting and proudly offer a full line of rechargeable and battery powered candles to our customers who desire intimate accent lighting without a live flame.

A Commitment to Technology and Product Excellence

Hollowick is proud to offer flameless candles that stand at the forefront of commercial LED lighting. Increasing demands by foodservice professionals for exceptional performance and lifelike ambience drives innovation and enhancement to the Hollowick Flameless line. Recent improvements in flicker technology, battery life and warranty illustrate our firm commitment to improving customer service, product satisfaction and the overall guest experience.

Recent Improvements:

- **TruFlame™ Technology** – a patented LED system with the most natural flicker and flame appearance available today is now featured in several of our most popular products.
- Extended battery life:
  - Evolution Series: Up to 24 hours on a 6 hour charge
  - Platinum Series: Up to 18 hours on an 8 hour charge
  - LED Tealights: Up to 75 hours on a single battery
- Extended Lifetime Warranty on Evolution Rechargeable LED Series

TruFlame™ LED Technology - Natural Flame Flicker and Color

What is LED (Light Emitting Diode) Technology?

LED Technology is tiny cool-burning light bulbs that fit easily into an electric circuit.

Benefits of LED lights:

- Extremely Long Life - Last 20 times longer than incandescent bulbs
- Very Durable - Nearly impossible to break with vibration or shock
- Less Heat - Same light output as incandescent, but with a fraction of the heat
- Exceptional Energy Efficiency - Very low draw on batteries = long battery life

Optional Remote Control

On/Off Static/Flicker

Optional Smart Guard

Anti Theft Device Inside

Candlelight

The Evolution Line represents the next generation of flameless table lighting for the commercial tabletop industry. With its induction charging system, Smart Guard theft deterrent system and now the remote control option, restaurants, hotels and nightclubs can provide the most realistic flame-like appearance any flameless system has to offer. Evolution Candles have both a flicker and a static mode.

Linkable Induction Charging Trays – With no metal charging pins, induction charging trays and candles are built to withstand the rigors of continuous commercial use. Four trays may be linked per power adaptor, allowing up to 48 candles to charge per adaptor.

Evolution candles fit most Hollowick Lamps. See page 14 for more details.

Induction Charging System

CANDLE OPERATION:

- Press once to activate "FLICKER" mode
- Press again for "STATIC" mode (continuous light)
- Press again to turn "OFF"

Batteries will stay fresh on tray and won't overcharge

Solid Red = Charging

Solid Green = Fully Charged

Optional Remote Control

- Remote Control functions: On/Off; Flicker/Static
- Remote operating radius is approximately 20 feet
- Remote will control any Evolution Remote candle
- Remote powered by one replaceable CR2025 battery (included)
- One Remote is included with each Evolution Remote system set (remotes also sold separately)

Optional Smart Guard Theft Deterrent System

Smart Guard is an optional anti theft system, available only on the Evolution series, to help deter theft. How it works:

- Smart guard activates when Evolution candles are turned on
- If picked up for more than 5 seconds, candles with Smart Guard will turn off and a red light indicator on the top of the candle will flash
- If the candle is not returned to its upright position within 5 seconds it will also start to "beep"
- Once it is returned to its upright position the candle will reset
- If the candle is not returned to a stable upright position then the red flashing light and beeping will continue

Turning the candle off does NOT deactivate Smart Guard. Smart Guard is active in ANY mode once turned on and remains active until it is either returned to the powered charging tray or deactivated with the "Smart Guard Key" (key sold separately).

Platinum Rechargeable LED Series

Rechargeable NiMh Battery

Up to **18** hrs of light from an 8 hr charge

ONE YEAR LIMITED

1

WARRANTY

Amber

Warm White

Platinum candles fit most Hollowick Lamps. See page 14 for more details.

The Platinum Series leads the market of Nickel Metal Hydride (NiMh) commercial rechargeable systems. Designed specifically to withstand the rigors of the foodservice environment, the Platinum system, available in two colors, is the smart choice for flameless table lighting.

- Patented enhanced random flicker technology
- Linkable wall-mountable charging trays
- Two color choices: Warm White & Amber

Linkable Charging Trays – The charging tray features a solid, durable receiving pin that is designed to withstand the rigors of commercial use and is less prone to breakage as some lesser quality systems are known to be. Four trays may be linked per power adaptor, allowing up to 48 candles to charge per adaptor. The Platinum Series charging tray is designed so it can be mounted on a wall, preserving valuable counter and table space.

Nickel Metal Hydride (NiMh) Batteries – An 8 hour charge produces up to 18 hours of run time.

Charging Indicators – LEDs on the charging tray indicate charging status for each candle. GREEN means fully charged; RED means charging

No Overcharging Worries - Our commercial rechargeable systems are designed to charge each candle as needed and to adequately keep each candle unit fresh

Lamp Suggestions and Warranty Information

Hollowick offers a variety of high quality lamps that will accept the Evolution, Platinum and Battery Powered Tealight candles. Please refer to the main Hollowick Catalog or www.RestaurantCandles.com for a full selection of Hollowick lamps. When choosing the best lamps for your flameless lighting systems, please consider the following points:

To create a more believable "flame-lit" atmosphere, consider masking flameless candles in lamps with a textured or non-transparent finish. Frosted and satin lamps work best - they mask the actual candle shape from showing through the lamp, but allow light and flicker action to shine through. Other excellent nontransparent textured lamp choices include: Jewel finish lamps, Mica, Mosaic, Onyx, and Mocha lamps.

Lamps for Evolution and Platinum rechargeable candles should be a minimum of 3" tall. However, for optimal "flame" position and appearance, lamps measuring 3.75" or taller are recommended. Most tealight and votive size lamps will work best with the LED Tealights.

LIMITED LIFETIME Warranty on Evolution Series

LIMITED LIFETIME ∞ WARRANTY

The Evolution system carries a limited lifetime warranty. This limited warranty applies to manufacturing defects with candles, charging tray(s), transformer, and power adaptor(s).

ONE YEAR Limited Warranty on Platinum Series, TruFlame™ LED Wax Pillars and Indoor/Outdoor Pillars

ONE YEAR LIMITED 1 WARRANTY

The Platinum Series and TruFlame™ LED Wax Pillars carry a one-year limited warranty. This limited warranty applies to manufacturing defects with candles, charging tray(s), transformer, and power adaptor(s).

Failure to follow these instructions voids manufacturer's warranty.

- Only use the power adaptor supplied with the candle set
- Do not attempt to open any part of the charging tray(s), transformer, power adaptor, or candles
- Keep the charging tray(s), transformer, power adaptor, and candles away from heat, water or condensation
- Hollowick accepts no responsibility from misuse/abuse of its products, or the failure to observe charging instructions and general guidelines for proper use

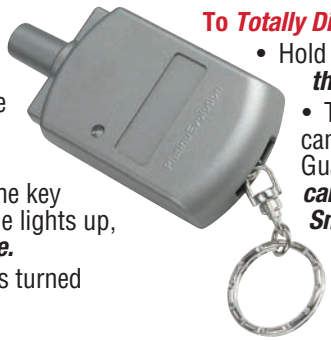
Smart Guard Key Instructions

The Smart Guard key is an optional device that can be purchased separately, and either temporarily disables, or totally disarms a Smart Guard Evolution Candle, without needing to place it back on a powered charging base.

To *Temporarily* Disable Smart Guard:

- Hold the candle at a slight angle and press the key in the candle. Once the red LED on the candle lights up, ***immediately release the key from the candle.***

Smart Guard is now deactivated until the candle is turned back on.

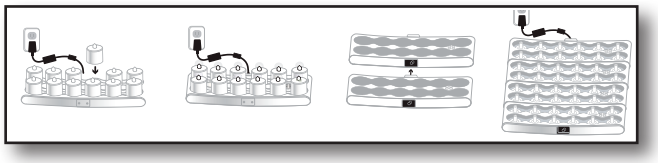


To *Totally Disable* Smart Guard:

- Hold the candle at an angle, ***press and hold the key in the candle for 2 seconds.***
- The red LED in the candle will light up and the candle will "beep" once. When complete, Smart Guard will be disabled. ***Please note that when the candle is turned on again after using this feature, Smart Guard WILL NOT ENGAGE.*** To reset the Smart Guard after using this feature, the candle will need to be set back on a powered charging tray.

Instructions

Charging Instructions



CONDITIONING

IMPORTANT: TO PROPERLY CONDITION YOUR CANDLES, AN INITIAL CHARGE OF 20 HOURS IS REQUIRED BEFORE FIRST USE!!!

Before putting your candles into operation, be sure to charge your candles for 20 hours to complete the conditioning charge. After twenty hours of charging, remove your candles from the charging tray, then turn them on and allow them to DISCHARGE COMPLETELY. Your candles are now ready to be recharged.

FAILURE TO FOLLOW THESE INSTRUCTIONS VOIDS ANY MANUFACTURER'S GUARANTEE

CHARGING

- Place your candles onto the charging tray. (If using the Platinum Series, firmly place the candles onto the charging tray receiving pins.)
- If using more than one charging tray, slide the charging trays firmly together. Both the Platinum and Evolution Series Power Adaptors are designed to charge up to four charging trays per power adaptor (up to 48 candles).
- Insert the supplied power adaptor into the charging tray and plug in.
- The charge indicator lights will illuminate **RED** when charging and **GREEN** when fully charged.

TROUBLE SHOOTING

Candle power adaptors are designed to charge up to 4 charging trays at a time (up to 48 candles) and come with an in-line reset button. Attempting to charge more than 48 candles will trip the reset. Use only the power adaptor provided to recharge your candles. Failure to do so voids the manufacturers guarantee.

Please note that Evolution Series and Platinum Series have different power requirements and their power adaptors are NOT interchangeable.

If indicator lights do not illuminate once plugged in, check the reset switch and reset, if tripped.

If indicator lights still do not illuminate, check your power supply, double check your charging tray connections, power cord connection, and repeat the charging instructions above.

STORAGE

Storage is recommended if your candles are not going to be used for more than 4-weeks. To store your candles, fully charge and remove them from the charging tray, making sure the on/off switch is in the off position.

TruFlame™ LED Wax Pillar Instructions

BATTERY INSTALLATION

- To release battery cover on bottom, push down and slide cover to the left.
- Install (4) AA batteries.* Be sure batteries are inserted in the proper direction (Fig. 1) and replace battery cover.

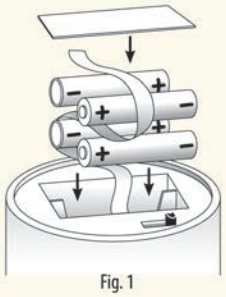


Fig. 1

CANDLE OPERATION

- For manual ON/OFF operation: Slide switch to ON to operate (Fig. 2).

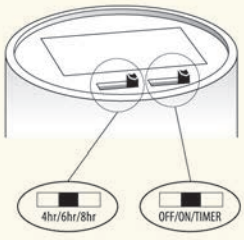

Fig. 3 Fig. 2

Timer and remote are not included on all candles

- To use 3-stage timer (not included on all candles): Select 4-, 6- or 8-hour time duration (Fig. 3). At the desired time slide switch to TIMER to activate (Fig. 2). Candle will automatically turn on at the set time every day and off after the set number of hours.
- To use remote (not included with all candles): Point remote toward candle and press ON. To turn off, press OFF.

***NOTE: Brand name alkaline batteries are recommended for maximum battery life**

CANDLE MAINTENANCE

- Clean with a soft, dry cloth.
- If needed, use a damp cloth and mild household soap.

CAUTION

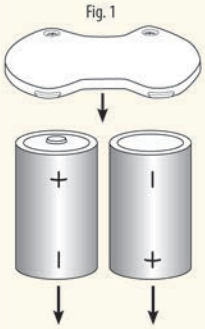
- Candle is made of REAL WAX and is FLAMMABLE. This product is designed for INDOOR USE. Keep away from any heat source that could cause the wax to soften, melt or catch fire.
- To avoid wax deposits on any surfaces, place on a protective base.
- Failure to insert batteries correctly may shorten the life of the batteries or cause batteries to leak, which may damage candle.
- Do not mix old and new batteries. Do not mix alkaline, carbon zinc, rechargeable nickel cadmium or rechargeable nickel metal hydride batteries.
- Do not dispose of batteries in fire. Recycle or dispose of batteries per battery manufacturer recommendations.

Indoor/Outdoor LED Pillar Instructions

BATTERY INSTALLATION

- To release battery cover on base of candle, loosen screws using a Philips head screw driver, and pull open.
- Install two D batteries (not included). Be sure batteries are inserted in the proper direction (per polarity marking inside candle) and replace battery cover (Fig. 1).

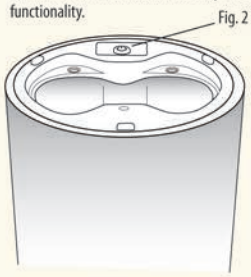
Fig. 1



CANDLE OPERATION – MANUAL

Press ON/OFF button once to turn candle on. Press again to turn OFF (Fig. 2). In manual mode, only the eight hour timer setting is available. To activate an eight hour timer mode, turn candle to ON mode, then press and hold ON/OFF button until LED blinks two times. Candle will now automatically turn on at the set time every day and turn off after eight hours. See remote operation for additional timer settings and functionality.

Fig. 2



CANDLE OPERATION – REMOTE

(USES CR2025 BATTERY–INCLUDED)

To use remote: point towards candle and press ON. To turn off, press OFF. Remote will work within a 30ft range of candle.

TIMER SETTINGS

The outdoor pillar has four separate timer modes to choose from: 4hr, 6hr, 8hr or 10hr. To activate the desired timer setting while candle is ON press button of your desired timer setting 4, 6, 8,10 and hold for aproximatley one second. The LED will blink 1x for 4hr, 2x's for 6hr, 3x's for 8hr, and 4x's for 10hr. Once complete, candle will automatically turn on at the set time every day and turn off after the selected number of hours.

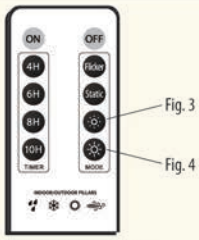


Fig. 3

Fig. 4

FLICKER OR STATIC LIGHT MODE

To chose flicker or static light mode: while candle is ON press either FLICKER or STATIC button on the remote. Flicker is the default setting. Static is contiuous light with no flicker.

DIMMER CONTROL

The outdoor pillar has five brightness settings to choose from (the default setting is the brightest). To dim your candle in either flicker or static mode, point remote at the pillar and press button (Fig. 3) to dim candle one level. To adjust pillar to a brighter setting use the button (Fig. 4).

CANDLE MAINTENANCE

- Clean with a soft, dry cloth.
- If needed, use a damp cloth and mild household soap
- Do not completely immerse candle in water

CAUTION

- Failure to insert batteries correctly may shorten the life of the batteries or cause batteries to leak, which may damage candle
- Do not mix old and new batteries. Do not mix alkaline carbon zinc, rechargeable nickel cadmium or rechargeable nikel metal hydride batteries.
- Do not dispose of batteries in fire. Recycle or dispose of batteries per battery manufacturer recommendations.
- Changes or modifications not expressly approved by the party responsible for the compliance could void the user's authority to operate the equipment.
